Our society's literate population who are into research and teaching are dependent on libraries for accessing information and information sources. Thus the significance and need of library and information services are widely realized and recognized. Library users always appreciate if the relevant and accurate information is quickly and timely made available to them. Students, research scholars and faculty members are mostly dependent upon the library for information resources and services to fulfill their information needs and to keep themselves up to date. Libraries are acquiring relevant material to meet the requirements of the changing demands of the users. The procurement of information resources by the library and its proper organization helps in information dissemination expeditiously and ensures

its optimum use by the users. Users' interests are of prime importance in the library sector. It has a direct bearing on information-seeking behaviour which differs from individual to individual and from discipline to discipline. This book will be of great interest to research scholars, faculty members, students of Punjabi Literature. It will help the librarians to organize their collection accordingly. This book is based on the study conducted by the research in perspective of six universities i.e. University of Delhi (Delhi), University of Jammu (Jammu), Kurukshetra University (Kurukshetra), Panjab University (Chandigarh), Punjabi University (Patiala), Guru Nanak Dev University (Amritsar).

The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

What is Punjabyat? What are the different notions of Punjab? This volume analyses these ideas and explores the different aspects that constitute Punjab as a region conceptually in history, culture, and practice. Each essay examines a different Punjabi culture—language-based and literary; religious and those that define a 'community'; rural, urban, and middle class; and historical, contemporary, and cosmopolitan. Together, these essays unravel the complex foundations of Punjabyat. The volume also shows how the recent history of Punjab—partition, aspirations of statehood, and a large and assertive diaspora—has had a discernible impact on the region's scholarship. Departing from conventional studies on Punjab, this book presents fresh perspectives and new insights into its regional culture.

• For M.Com., MBA, MFC, MBE, M.A(Eco.),MCA, B.Com(H), B.Com(P),B.A.(H)Eco,BBA,BBS,BBE, B.A., etc. of all Indian Universities. Also for CA., ICWA, IAS, and other Equivalent Competitive Examinations. • Presents a clear, simple, systematic and comprehensive exposition of

the methods, principles and techniques of statistics in various disciplines with special reference of commerce, management, economics and business. • A large number of solved (about 1500) problems and unsolved (nearly 3000) problems have been included to enable the user of statistical techniques and methods in commerce, economics, management and other related areas.

This book presents a guide for research methodology and scientific writing covering various elements such as finding research problems, writing research proposals, obtaining funds for research, selecting research designs, searching the literature and review, collection of data and analysis, preparation of thesis, writing research papers for journals, citation and listing of references, preparation of visual materials, oral and poster presentation in conferences, and ethical issues in research . Besides introducing library and its various features in a lucid style, the latest on the use of information technology in retrieving and managing information through various means are also discussed in this book. The book is useful for students, young researchers, and professionals.
