~~What is user centered web design, and why is it so effective?~~

Where To Download User Centered Website Development A Human Computer Interaction Approach

In broad terms, user centred design (UCD) is a design philosophy and a process in which the needs, wants, and limitations of the end user of an interface or document are given extensive attention at each stage of the design process. This helps to put customers at the heart of the online experience. By designing for users first and foremost, not only does the user experience improve (and thus, profit), but so does development efficiency and cost - designing based on user's requirements ...

~~User-Centered Web Site Development: A Human Computer ...~~

User-Centered Design or User-Driven Development is a framework of processes in which usability goals, user characteristics, environment, tasks and workflow of a product, service or process are given extensive attention at each stage of the design process. User-centered design can be characterized as a multi-stage problem-solving process that not only requires designers to analyze and envision the way users are likely to consume a product, but also to validate their assumptions with regard to the

~~User-centered design — Wikipedia~~

User centered web design Over the past year, we've seen a trend towards user-centred design, a practice that caters to a user's needs and expectations, as opposed to forcing them to consume whatever is offered. As the web has evolved, users have become more sophisticated. The demand for user-specific content has increased.
