~~The best parts of you are hidden where you're most afraid to look." --Michael Benner, Fearless Intelligence"Fear is a doorway to understanding yourself better. The secret is to plumb the depth and breadth of your anxiety and confusion in relaxed levels of expanded awareness. Becoming more self-aware of your anxious feelings reveals the personal wisdom hidden within heartache and upset. "As we understand our self better, we become less alienated and more content -- calmer, happier, and more self-confident. Fewer random thoughts demand our attention. This or that occurs as this and that, and behavior becomes less reflexive -- more appropriate, even-tempered and well reasoned. Soon, defensiveness yields to acceptance, competition surrenders to cooperation -- lines fade, borders dissolve, and your perspective expands to include the 'Wholeness' of life."~~

~~Grandstream Networks, Inc.~~

~~This is the first book not only to detail the relationships neoliberalism encourages us to have but also to see how friendship can provide a bulwark of resistance to it. Written in an engaging style, it will be understandable to political theorists, philosophers, social scientists, and cultural theorists.~~

~~Grandstream Networks, Inc.~~

~~Multiple factor analysis (MFA) enables users to analyze tables of individuals and variables in which the variables are structured into quantitative, qualitative, or mixed groups. Written by the co-developer of this methodology, Multiple Factor Analysis by Example Using R brings together the theoretical and methodological aspects of MFA. It also includes examples of applications and details of how to implement MFA using an R package (FactoMineR). The first two chapters cover the basic factorial analysis methods of principal component analysis (PCA) and multiple correspondence analysis (MCA). The next chapter discusses factor analysis for mixed data (FAMD), a little-known method for simultaneously analyzing quantitative and qualitative variables without group distinction. Focusing on MFA, subsequent chapters examine the key points of MFA in the context of quantitative variables as well as qualitative and mixed data. The author also compares MFA and Procrustes analysis and presents a natural extension of MFA: hierarchical MFA (HMFA). The final chapter explores several elements of matrix calculation and metric spaces used in the book.~~

~~This chart book is designed to document current differences in well-being by race and Hispanic origin and to describe how such differences have evolved over the past several decades. The charts included in this book show key indicators of well-being in seven broad categories: (1) population; (2) education; (3) labor markets; (4) economic status; (5) health; (6) crime and criminal justice; and (7) housing and neighborhoods. Each section begins with a brief introduction and overview of the charts presented. This information provides a benchmark for measuring future progress and can highlight priority areas for reducing disparities across racial and ethnic groups. All the racial and ethnic groups considered here have experienced substantial improvements in well-being over the second half of the century, but disparities between groups have persisted, or in some cases, widened. An example is the decline in the relative economic status of Hispanics over the past 25 years, reflecting the increasing proportion of Hispanics with lower average levels of education, in large part because of immigration. The section on education, which makes disparities in educational attainment and achievement clear, contains information on family participation in literacy activities and preschool education. One chart reviews computer use by elementary school children, and two charts cover reading and mathematics proficiency scores, both of which have implications for the pursuit of higher education. Three charts focus on the educational attainment of adults over 25 years old. An appendix provides a list of other government publications and Internet addresses for more information. (Contains 49 graphs and bar charts.) (SLD)~~

~~Grandstream Networks, Inc.~~

~~Offers pedagogical techniques for teaching the works of Charles W. Chesnutt in college classrooms, including considerations of architecture, borders, critical reception, dialect, disability, economics, eugenics, folklore, gothic fiction, hauntings, intertextuality and allusion, literary theory, passing, plantation tradition, publishing, race, sentimentalism, and whiteness. Gives syllabus suggestions for undergraduate and graduate courses.~~
