The following is an example of the use of the TapRoot® System to analyze a medium-risk, environmental incident (Fish Kill) at a chemical plant. The incident has been de-identified and is not intended to represent an actual event at any particular location. This investigation was performed using the simple (low-to-medium risk) investigation

~~Using TapRoot Root Cause Analysis Final~~

The TapRoot® System has been used since 1991 for the investigation of process safety incidents. A limited survey conducted in 2001 by the Center for Chemical Process Safety showed that it was one of the most used root cause analysis systems by its members. The TapRoot® System also has broad use in a variety of other industries including:

~~Using the TapRoot® System for Process Safety Incident ...~~

A taproot is a large, central, and dominant root from which other roots sprout laterally. Typically a taproot is somewhat straight and very thick, is tapering in shape, and grows directly downward. In some plants, such as the carrot, the taproot is a storage organ so well developed that it has been cultivated as a vegetable. The taproot system contrasts with the adventitious or fibrous root system of plants with many branched roots, but many plants that grow a taproot during germination go on to

Use TapRoot® to: Collect, understand, and organize evidence about what happened. The TapRoot® tool, the SnapChar® diagram, reduces... Identify all the Causal Factors (the human errors or equipment failures) that led to the problem - the starting point... Use expert guidance to analyze human errors ...

~~The TapRoot® Advantage | TapRoot® Root Cause Analysis~~

The TapRoot® System is used by leading companies around the world to investigate and fix the root causes of major accidents, precursor incidents, quality issues, human errors, maintenance problems, medical mistakes, productivity issues, manufacturing failures, environmental releases, audit findings ... in other words, all types of mission-critical problems.

~~About the TapRoot® Root Cause Analysis System~~

Are you a TapRoot® Software User? Learn how to maximize the benefits of using software to perform all of your investigations. Our "Performing an Investigation Using the TapRoot® Software" Webinar (90-minutes) will ensure you are aware of all the tips and tricks available to you.

~~Webinar: Performing an Investigation Using the TapRoot ...~~

The TapRoot® system for root cause analysis is a set of integrated tools put together for the purpose of evaluating, for root causes and corrective actions, any occurrence or audit finding.

~~Example Application of TapRoot®~~

TapRoot® • Not depending on investigator expertise like deductive reasoning methods • Less confirmation bias • TapRoot® provides structure for use by non- experts: - Focus on human error - Thorough information collection - More than one root cause - More efficient problem solving - Consistent results enable trending over time

~~Effective Incident Investigation with TapRoot~~

Root Cause Analysis is a critical part of your management system. TapRoot® was built (and is continuously improved) to help your company meet the ever increasing demands for improved safety, environmental stewardship, efficiency, regulatory compliance, and customer satisfaction. See how we can help you meet these challenges.

~~Manufacturing Professionals use TapRoot® Root Cause ...~~

Taproots are one of the three major types of root systems found in plants; the other two are adventitious root system and fibrous root system. Taproots arise from the radicle of a germinating embryo. The radicle of many plant species dies soon after maturation and, hence, the taproot gets converted into the fibrous root system in the later stages.

~~Taproot System: Types, Modifications and Examples ...~~

The TapRoot® System provides people the science to find and fix the causes of human error and equipment failure - whether it is reactively stopping low to medium risk incidents (the topic of this book) or investigating major accidents; or proactively improving performance by using the TapRoot® Techniques to find and fix a problem's root causes before an accident occurs.

~~TapRoot® Book 3 Set: Using the Essential TapRoot ...~~

Plants with tap roots can be contrasted with plants that have a fibrous root system. Carrots are commonly-eaten tap roots. There are a number of ways in which a tap root can be beneficial to a plant. One of the most important is that it allows the plant to reach down quite far to find water to sustain itself.

~~What is a Tap Root? (with pictures)~~

Using TapRoot® Root Cause Analysis for Major Investigations features an in-depth look at the techniques used to perform a TapRoot® Investigation. 2.) Learn to do investigations for low-to-medium risk incidents as fast and easy as possible with credible results and effective corrective actions.

~~TapRoot®~~

Merely said, the using the taproot system for incident investigation and is universally compatible like any devices to read. Browsing books at eReaderIQ is a breeze because you can look through categories and sort the

~~Using The Taproot System For Incident Investigation And~~

Taproot, main root of a primary root system, growing vertically downward. Most dicotyledonous plants (see cotyledon), such as dandelions, produce taproots, and some, such as the edible roots of carrots and beets, are specialized for food storage.
