"Iceberg right ahead!" yelled Frederick Fleet, a crewmember aboard the Titanic. The ship had only seconds to spare. Titanic's officers steered the ship to the left as quickly as they could to avoid a head-on collision. But they weren't fast enough. The right side of the ship struck the side of the ice mountain floating in the north Atlantic. The fate of the Titanic—and its 1,317 passengers and 885 crewmembers—had been sealed. Titanic's Fatal Voyage tells the devastating story of how the gigantic and supposedly unsinkable ship was swallowed by the sea on its maiden voyage. Readers will learn about the ocean liner's journey in vivid detail, as well as incredible tales of courage and survival. The fascinating content and large-format color images, maps, and fact boxes bring the Titanic's tragic story to life. Titanic's Fatal Voyage is part of Bearport's Titanica series.

This work, incorporating previously unpublished interviews and articles, retraces the quest of Henry Corbin into the imaginal realm of the unseen self, the domains of angels and numinous beings. A study of religious philosophy, exploration of visionary faith, these pages offer a superb meditation of the great themes of Perso-Islamic mysticism—the Sufi theory of knowledge, the voyage within the soul, le rituel de la coupe—and an illuminating glimpse into the philosophic universes of Sohrawardi, Ibn Arabi, and Molla Sarda Shirazi.

Following the brutal 1954 murders of two children in Sioux City, Iowa, police attempted to quell public hysteria by arresting 20 men whom the authorities never claimed had anything to do with the crimes. Labelled as sexual psychopaths these gay men were sentenced to a mental institution until 'cured'. Shedding a harsh light on 1950s attitudes toward homosexuality, this carefully researched account of this horrendous event shows how the paranoia of the McCarthy era destroyed the lives of gay men and exposes a dark chapter in the history of post-war America.

The sea and Great Lakes have inspired American authors from colonial times to the present to produce enduring literary works. This reference is a comprehensive survey of American sea literature. The alphabetical arrangement of the volume facilitates access to facts about major literary works, authors, characters, themes, vessels, places, and ideas central to American literature of the sea and Great Lakes. While the book includes entries for canonical white male authors such as Herman Melville and Jack London, it also gives considerable attention to women at sea and to ethnically diverse writers, works, and themes. Each of the entries is written by an expert contributor and many provide brief bibliographies. In addition, the volume closes with a chronology and a list of works for further reading.

This brief and witty book, by the award-winning science writer Donald Goldsmith, takes on key questions about the origin and evolution of the cosmos. By clearly laying out what we currently know about the universe as a whole, Goldsmith lets us see firsthand whether modern cosmology is in a state of crisis.

Argues that the Panic of 1819 was America's first experience with a modern boom-bust cycle, and most importantly, much more than a banking panic resulting from the mismanagement of the newly created second Bank of the United States and a number of state chartered banks.
