Waves Review - Answers #2 - Physics

Waves are one way energy is moved from place to place. Amplitude is the height of the wave. Wavelength is the distance between wave peaks. The sound we hear is a type of wave that travels through the air.

Wave Properties - Generation Genius

For webquest or practice, print a copy of this quiz at the Physics: Intro to Waves webquest print page. About this quiz: All the questions on this quiz are based on information that can be found at Physics: Intro to Waves. Instructions: To take the quiz, click on the answer. The circle next to the answer will turn yellow. You can change your answer if you want.

Science Quiz: Physics: Intro to Waves

A wave has a wavelength, an amplitude, a frequency, and a period. The wavelength is the distance from one peak to the next, or from one trough to the next. The amplitude is the maximum height of a wave from its rest position. The frequency is the number of waves per second. The period and the frequency are related by the equation:
