diFiore's Atlas of Histology with Functional Correlations explains basic histology concepts through realistic, full-color composite and idealized illustrations of histologic structures. Added to the illustrations are actual photomicrographs of similar structures, a popular trademark of the atlas. All structures are directly correlated with the most important and essential functional correlations, allowing students to efficiently learn histologic structures and their major functions at the same time. This new edition features:

- New chapter on cell biology accompanied by both drawings and representative photomicrographs of the main stages in the cell cycle during mitosis
- Contents reorganized into four parts, progressing logically from Methods and Microscopy through Tissues and Systems

diFiore's Atlas of Histology is the perfect resource for medical and graduate histology students.

It is more than a repertory. It is a method. It is also a guide to the study of materia medica. Five face types are used to indicate the means in which the remedies were encountered in the findings. Edited by T.F. Allen, this work is often prized for its accuracy and forthright argument.
