"Entertaining, informative, thought-provoking, mysterious, poetic. Men who read it will surely learn much about themselves, and women—particularly those who are unfortunately misled into thinking of men as "the enemy"—will find it a real eye-opener."—Ruth Tiffany Barnhouse, M.D., Th.M., Harvard University Robert A. Johnson's classic work exploring the differences between man and woman, female and male—newly reissued. What does it really mean to be a man? What are some of the landmarks along the road to mature masculinity? And what of the feminine components of a man's personality? Women have developed, over the centuries, considerable expertise in the technique of adapting to men, and for good reason, but that is not the same as truly understanding them. The transition from male childhood to real manhood is a complicated struggle, and explored in this book. As timely today as when it was first published, He provides a fascinating look into male identity and how female dynamics influence men.

Robert A. Johnson's groundbreaking, brilliant, and insightful work on how women transition into being mature and developing their own identity—newly reissued. What does it mean to be a woman? What is the pathway to mature femininity? And what of the masculine components of a woman's personality? Many scholars and writers have long considered that the ancient myth of Amor and Psyche is really the story of a woman's task of becoming whole, complete, and individuated. Here, examining this ancient story in depth and lighting up the details, Robert A. Johnson has produced an arresting and perceptive exploration of what it means to become a woman. You will not read these pages without understanding the important women in your life and a good deal about yourself as a woman. More important than ever before, She offers a compelling study of women.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
