~~Weathering, Erosion and Deposition Multiple Choice~~

Erosion is different from weathering since erosion has the moving element.

Bookmark File PDF

Weathering And Erosion

The main driving force behind all agents of erosion is gravity. Without gravity the other major natural agents of erosion such as: wind, running water, glaciers, waves, and rain would not occur.

Weathering And Erosion

~~Review Regents Questions By~~
~~Chapter | Mr. Paccione's ...~~

1 Weathering is a mechanical or chemical surface process that breaks rocks into smaller pieces. 2 Plants can cause mechanical weathering. 3 The chemical composition of rock is not affected during any weathering process. 4 Soil is a mixture of weathered rock, organic matter, water, and air that supports the growth of plant life.
