Installing and Configuring WebSphere 7.0
On WebSphere Application Server
Environments, select Application Server to
create a standalone application server
profile and then click the Next button to
continue. Note: The Application Server
environment will create a default stand-
alone application server called AppSrv01
during the installation.

Installing and Configuring WebSphere 7.0
The default port for the WebSphere
Application Server Administrative
Console depends on the protocol specified
in the URL and the port number assigned
when the profile was created. For the http
protocol, the default port is 9060. For the
https protocol, the default port is 9043.

Logging in to the IBM WebSphere
Application Server ...

WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.
