The Student Study Guides are important and unique components that are available for each of the six books in The Medieval & Early Modern World series. Each of the Student Study Guides is designed to be used with the student book at school or sent home for homework assignments. The activities in the Student Study guide will help students get the most out of their history books. Each student study guide includes a chapter-by-chapter two-page lesson that uses a variety of interesting activities to help a student master history and develop important reading and study skills.

A history of America's tangled involvement in the transition of British and French West African territories to statehood.

Originally published in 1980 and here re-issued with an updated preface, this book deals with the role of the horse in the societies of West Africa during the pre-colonial period. It traces the history of its introduction and its diffusion within West Africa, and examines the problems of maintaining horses in such a harsh environment. The use of horses in warfare is analysed but the non-military aspects of the West African horse culture are also discussed, principally the use of horses as tokens of status and wealth. The book includes a review of the decline of the West African horse culture in the 20th century, reflecting the passing of a political system based on warfare and slavery.

Why does Western civilization dominate the rest of the world? This book is a summary of "Civilization: The West and the Rest," by Niall Ferguson. The central question is: Why did the West dominate the Rest and not vice versa? The book describes six concepts that the West has developed that allow them to leap ahead of the Rest, unleashing the Industrial Revolution and increasing human productivity. Six hundred years ago, Ming China and Ottoman Turkey dominated the world civilizations, while Western Europe was a miserable backwater, devastated by incessant war and disease. But today, Western civilization has risen to global dominance. How has the West overtaken its Eastern rivals in the past 500 or so years? In Civilization, Niall Ferguson argues that beginning in the 15th century, the West developed six powerful concepts that the Rest lacked: competition, science, property rights, medicine, consumerism, and work ethic. These six killer apps allowed the West to leap ahead of the Rest, unleashing the Industrial Revolution and increasing human productivity. Yet now, the days of Western predominance are numbered because the Rest are adopting these same concepts, while the West has lost faith in its own civilization. Read this book and learn how these six killer apps help the West dominate the world. This guide includes * Book Summary—helps you understand the key concepts. * Online Videos—cover the concepts in more depth. Value-added from this guide: * Save time * Understand key concepts * Expand your knowledge

This study arises from the need for comparative historical perspectives on the different styles of French and British colonialism, and the localised impacts of the regimes in West Africa. The work is broadly divided as: an overview, including a summary of new trends in African historiography; an examination of colonial methods; a study of socio-economic impact and the impact on indigenous political institutions and culture. A considerable part of the study addresses the question: How did the colonial styles of governance determine the post-colonial states? The author identifies a major point of divergence to be French centralising and assimilationist tendencies in education and the economy, as opposed to a British laissez-faire approach. This explains, in part, the uniformity in currency, language and culture which makes francophone Africa a distinctive cultural zone. Common concerns - which stem from the pre-colonial era - were mainly trade and trans-border co-operation. Pursuance of common goals, the author stipulates, paved the way for institutions of economic integration - e.g. ECOWAS.

Over 300 questions (and Answers) are included in this study guide to help you prepare for the AP World History exam.

This book has an abundance of time-saving, practical strategies for teachers in grades 6-12. A treasury of activities and resources, this book explains, demonstrates, and helps you select among a wide variety of differentiation processes, such as whole class differentiation, tiered lessons, learning centers, flexible grouping, literature circles, individualized instruction, independent study, and learning contracts.

This book studies the impact of the Atlantic slave trade on the 'Slave Coast' of West Africa, an area covering modern south-eastern Ghana, Togo, Benin, and south-western Nigeria. This region was one of the most important sources of slaves for the Atlantic slave trade, and its history provides an exceptionally well-documented illustration of the effect of the trade on the indigenous African societies involved in it. The expansion of slave exports during the seventeenth and early eighteenth centuries coincided with a period of political disorder, which ended with the rise of the new kingdom of Dahomey. Dahomey was a more militarized and more politically centralized state than those which preceded it in the region, and its distinctive character reflected the impact of the slave trade. This is the first detailed study of the early history of the Slave Coast for over twenty years. Robin Law examines the events which preceded the rise of Dahomey, the organization of the slave trade and its impact on the domestic economy, and the social and political structures of Dahomey and its predecessors. This is a meticulously researched, lucid, and scholarly analysis which makes an important contribution to the history of both early modern European expansion and pre-colonial West Africa.

Accompanying Study Guide to Geography: Realms, Regions and Concepts. The best-selling book in the World Regional Geography market, Regions provides general readers with up-to-date information on various topics around the world. It delivers the authors' authoritative content, outstanding cartography, currency, and comprehensive coverage, in a technology-rich package.
