In the twenty-first century, China has emerged as the leading challenger to U.S. global dominance. China is often seen as a sleeping giant, emerging out of poverty, backwardness, and totalitarianism and moving toward modernization. However, history shows that this vast country is not newly awakening, but rather returning to its previous state of world eminence. With this compelling perspective in mind, D. E. Mungello convincingly shows that contemporary relations between China and the West are far more like the 1500-1800 period than the more recent past. This fully revised second edition retains the clear and concise qualities of its predecessor, while developing important new social and cultural themes such as gender, sexuality, music, and technology. Drawing from the author's thirty years of experience teaching world history, this book illustrates the importance of history to students and general readers trying to understand today's world.

Now in a special gift edition, and featuring a brand new foreword by Anthony Gottlieb, this is a dazzlingly unique exploration of the works of significant philosophers throughout the ages and a definitive must-have title that deserves a revered place on every bookshelf.

A foundational work of radical anticolonialism, back in print Originally published in 1974, *The Fourth World* is a critical work of Indigenous political activism that has long been out of print. George Manuel, a leader in the North American Indian movement at that time, with coauthor journalist Michael Posluns, presents a rich historical document that traces the struggle for Indigenous survival as a nation, a culture, and a reality. The authors shed light on alternatives for coexistence that would take place in the Fourth World—an alternative to the new world, the old world, and the Third World. Manuel was the first to develop this concept of the “fourth world” to describe the place occupied by Indigenous nations within colonial nation-states. Accompanied by a new Introduction and Afterword, this book is as poignant and provocative today as it was when first published.

This fourth edition of this best-selling core history textbook offers a richly illustrated, single volume, narrative introduction to African history, from a hugely respected authority in the field. The market-leading range of illustrated material from prior editions is now further improved, featuring not only additional and redrawn maps and a refreshed selection of photographs, but the addition of full colour to make these even more instructive, evocative and attractive. Already hugely popular on introductory African History courses, the book has been widely praised for its engaging and readable style, and is unrivalled in scope, both geographically and chronologically - while many competitors limit themselves to certain regions or eras, Shillington chronicles the entire continent, from prehistory right up to the present day. For this new edition, both content and layout have been thoroughly refreshed and restructured to make this wealth of material easily navigable, and even more appealing to students unfamiliar with the subject.
