Supply and demand trading is not rocket science and no one owns it or has a patent on it. The good news is that anyone can learn it, it is a simple market principle that has been in existence since there was a market and it will always be the same principle till there is no more market which will be the end of days. The even better news is that you don't need an MBA or even a high school diploma to learn it and use it to make an unlimited income from trading. Using supply and demand is a no brainer and doesn't require years to learn it and use it. Supply and demand is the only way live markets work meaning for every buyer there has to be a seller and for every seller there has to be a buyer, it's that simple. Supply and Demand Trading 101 is written for brand new beginner traders who wish to be a self-directed investor and trading and do trading on their own. The best way to learn supply and demand trading is by actually learning it the right way from the start. There are a lot of tips and tricks in the book that can help a beginner cut down their learning curve and get them making real money right away. When you have completed the reading of this entire book you will have an understanding of what a brand new self-directed beginner trading needs to know to make an unlimited income from trading the financial markets and how and where to get further information and even mentoring to help you to expedite your learning curve so you can begin making money right away.

What is that lyric in that one song? [!]The lure of easy money has a very strong appeal!. Maybe you decided to get into the day trading business of investing and/or investing and trading because you saw some late-night TV commercial about day trading with flashy offers. Perhaps you received a spam e-mail touting some day trading method or system that said you could make easy money in the markets; I suggest you reconsider if that's the case. Death by Day Trading is for all beginning aspiring investors and traders who are just getting their head around doing the day trading business who go online and do a search to find information on how to do financial market trading and it should be the first book a brand new beginner reads before any other books on trading as far as I'm concerned and will be the most harsh and brutal day trading book they have ever read. Everyone has their own ideas of what they think day trading is and what it can do for them; you need to look at it from a realistic perspective from the start and Death by Day Trading is absolutely going to help you to do that. This book is for beginners and will detail many of the things that a brand new trader must learn not to do before they can become consistently profitable in the live markets. You're heard the saying 'just say no to drugs'; just say no to day trading and you and your account will be waaaay ahead of the game to start off. Don't say I didn't warn you. OK, continue with your insanity and read the entire book to give yourself a fighting chance. Death by Day Trading can help you keep it simple and filter the huge amount of information out there down to only what you need to know right away and then can work towards adding more information and studies as you go. My trading philosophy is to start small and build on successs have limited exposure while you hone your skills, then progress as you become more competent. You can use Death by Day Trading and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd, don't become one of them.

Van Sickle and Rodewald look at the fur trades cultural impact and demonstrate the great extent to which white adventurers, explorers and traders heavily relied upon the Native American tribes and emphasize the overriding role of Indian people in exploration, wilderness transportation, survival, and the collection of pelts and hides. They focus their work around the year 1833.

This trading ledger was created by an active stock trader and allows the user to make detailed journal entries of all of their trading activities. Numerous psychological studies have determined that the best way for humans to learn is by writing things down with pen and paper, and then reviewing this information periodically. The author of this ledger holds a degree in psychology and used his knowledge of human learning to develop an intuitive ledger that allows traders to clarify their thoughts on paper and analyze all of their transactions. Even the cover has been designed with vivid colors and a retro pattern to evoke the limbic system of the brain and encourage organization of thought processes. This workbook has been laid out in a manner to make effective use of goals, trading plans, and strategies by allowing the trader to keep a visual record of their progress. Created by best-selling author Ashbee A. Bakht, the trading ledger is printed on high quality paper and is published in a compact format making it easy to carry with you no matter where you choose to trade. The formatting of the workbook has been designed with special attention paid to allow for it to be flexible enough for all trading strategies (i.e. intraday/day/swing/long term, etc.).
