Wild Reptiles: Snakes, Crocodiles, Lizards, and Turtles ...

This fearsome animal is the largest reptile found in Africa, and the world's second-largest reptile (after the mighty saltwater crocodile). The species can reach lengths of over 6 m (20 ft.). A full-grown Nile crocodile is capable of taking prey as large as a wildebeest or buffalo. It is also responsible for hundreds of human fatalities every year.

African Reptiles List With Pictures & Facts ... - Active Wild

Both the rattlesnake and the crocodile have four pages of text devoted to each particular reptile. The draco and basilisk lizards and gila monster each receive two pages of text. Next, the rock python and gecko are presented; finally, there is a broad overview of the topics turtles and alligators, The print is large and easy to see; there is not so much text that it overwhelms a child reading the book.

All these guys are from South or Central America. The caiman lizards are experts at crushing their favourite food, snails. Basilisks have earned the moniker 'Jesus Christ Lizard' due to their ability to 'run' across water when disturbed. They can run about 5 feet per second across the surface. Of course, we house some beautiful snakes. On display right now are our two female Reticulated Pythons.

Reptiles are a group of tetrapod animals within the class Reptila, comprising today's turtles, crocodilians, snakes, amphisbaenians, lizards, tuatara, and their extinct relatives. The study of these traditional reptile orders, historically combined with that of modern amphibians , is called herpetology.
