Business revolves around making decisions, often risky decisions, usually with incomplete information and too often in less time than we need. Executives at every level, in every industry, are confronted with information overload, less leeway for mistakes, and a business environment that changes rapidly. In light of this increased pressure and volatility, the old-fashioned ways of making decisions--depending on intuition, common sense, and specialized expertise--are simply no longer sufficient. Distilling over thirty years of groundbreaking research, Winning Decisions, written by two seasoned business advisers and world leaders in behavioral decision studies, is a comprehensive, one-of-a-kind guide to the proven methods of making critical business decisions confidently, quickly-and correctly. Decision-making is a business skill which managers often take for granted in themselves and others-but it's not as easy as some might think. The authors, whose expertise has been sought out by over a hundred companies, including Arthur Andersen, Hewlett-Packard, IBM, and Unilever, contend that decision-making, like any other skill, must be developed and honed if it is to be used effectively. Winning Decisions offers step-by-step analyses of how people typically make decisions, and provides invaluable advice on how to improve your chances of getting your next big decision right the first time. The book is packed with worksheets, tools, questionnaires, case studies, and anecdotes analyzing major decisions made by organizations like British Airways, NASA, Shell Oil, and Pepsi. Some of the proven, straightforward techniques covered in Winning Decisions include how to: Reframe issues to ensure that the real problem is being addressed Improve the quality and quantity of your options Convert expert yet conflicting opinions into useful insights Make diversity of views and conflict work to your advantage Foster efficient and effective group decision-making Learn from past decisions--your own and those of others With Winning Decisions, managers and other professionals now have access to a proven set of skills and strategies they need for making the right decision, right away.

Explains the importance of making the right decisions in the business world, identifies the factors which often lead to poor decisions, and offers suggestions to help businessmen and women make the choices that will best benefit them.

Two experts in business management show how to avoid the ten common pitfalls that ensnare decision makers. The very latest research in the fields of business and psychology has been distilled into practical training methods that will save readers from ever making a bad decision again.

Become confident in your choices. Where should I live? Is it time to get a new job? Which job candidate should I hire? What business strategy should I pursue? We spend the majority of our lives making decisions, both big and small. Yet, even though our success is largely determined by the choices that we make, very few of us are equipped with useful decision-making skills. Because of this, we often approach our choices tentatively, or even fearfully, and avoid giving them the time and thought required to put our best foot forward. In Smart Choices, John Hammond, Ralph Keeney, and Howard Raiffa--experts with over 100 years of experience resolving complex decision problems--offer a proven, straightforward, and flexible roadmap for making better and more impactful decisions, and offer the tools to achieve your goals in every aspect of your life. Their step-by-step, divide-and-conquer approach will teach you how to: • Evaluate your plans • Break your potential decision into its key elements • Identify the key drivers that are most relevant to your goals • Apply systematic thinking • Use the right information to make the smartest choice Smart Choices doesn't tell you what to decide; it tells you how. As you routinely use the process, you'll become more confident in your ability to make decisions at work and at home. And, more importantly, by applying its time-tested methods, you'll make better decisions going forward. Be proactive. Don't wait until a decision is forced on you--or made for you. Seek out decisions that advance your long-term goals, values, and beliefs. Take charge of your life by making Smart Choices a lifetime habit.

Problems remain hidden in organizations for a number of reasons, including fear, organizational complexity, gatekeepers who insulate leaders from problems that are coming up, and finally, an overemphasis on formal analysis in place of intuition and observation. This book lays out the key skills and capabilities required to ensure that problems do not remain hidden in your organization. It explains how leaders can become effective problem finders, unearthing problems before they destroy an organization. The book explains how leaders can become an anthropologist, going out and observe how employees, customers, and suppliers actually behave. It then goes on to present how they can circumvent the gatekeepers, so they can go directly to the source to see and hear the raw data; hunt for patterns, including refining your individual and collective pattern recognition capability; "connect the dots" among issues that may initially seem unrelated, but in fact, have a great deal in common; give front-line employees training in a communication technique; encourage useful mistakes, including create a "Red Pencil Award"; and watch the game film, where leaders reflect systematically on their own organization's conduct and performance, as well as on the behavior and performance of competitors.

Left Brain, Right Stuff takes up where other books about decision making leave off. For many routine choices, from shopping to investing, we can make good decisions simply by avoiding common errors, such as searching only for confirming information or avoiding the hindsight bias. But as Phil Rosenzweig shows, for many of the most important, more complex situations we face--in business, sports, politics, and more--a different way of thinking is required. Leaders must possess the ability to shape opinions, inspire followers, manage risk, and outmaneuver and outperform rivals. Making winning decisions calls for a combination of skills: clear analysis and calculation--left brain--as well as the willingness to push boundaries and take bold action--right stuff. Of course leaders need to understand the dynamics of competition, to anticipate rival moves, to draw on the power of statistical analysis, and to be aware of common decision errors--all features of left brain thinking. But to achieve the unprecedented in real-world situations, much more is needed. Leaders also need the right stuff. In business, they have to devise plans and inspire followers for successful execution; in politics, they must mobilize popular support for a chosen program; in the military, commanders need to commit to a battle strategy and lead their troops; and in start-ups, entrepreneurs must manage risk when success is uncertain. In every case, success calls for action as well as analysis, and for courage as well as calculation. Always entertaining, often surprising, and immensely practical, Left Brain, Right Stuff draws on a wealth of examples in order to propose a new paradigm for decision making in synch with the way we have to operate in the real world. Rosenzweig's smart and perceptive analysis of research provides fresh, and often surprising, insights on topics such as confidence and overconfidence, the uses and limits of decision models, the illusion of control, expert performance and deliberate practice, competitive bidding and new venture management, and the true nature of leadership.

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In Decisive, Chip Heath and Dan Heath, the bestselling authors of Made to Stick and Switch, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In Decisive, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

The Alpha Book will explain the traits of an alpha, including charisma, the process of making strong and rightful decisions, how to best communicate with others at multiple levels, and how to turn your daily actions into fruitful prospects. Each of these traits is going to be explained in separate chapters, followed by examples of how to develop them in a creative way and apply them in your day-to-day activities.
