Air engine 2 I had previously built a reciprocating air engine out of wood back in 1985, and posted it here in 2007. I received a number of enquiries for plans for that engine, but the design for that air engine wasn't really one that lent itself to building from plans. So I came up with a better design for my air engine 2.

Air engine 2 - woodgears.ca

Free Hot Air and Stirling Engine Plans. Hot Air and Stirling Engines run using a sealed system of air where one end is heated and the other cooled, either naturally or by being immersed in a liquid. Between these ends is a displacer piston to move the air around, pushing the cooler air to the hot end and the hotter air to the cooler end.
