More interesting multiplying integers word problems. Problem #1. From sea level, a submarine descends 40 feet per minute. Where is the submarine in relation to sea level 5 minutes after it starts descending? Solution In 1 minute, the submarine is 40 feet below sea level. This situation can be represented with -40 feet.

## ~~Multiplying Integers Word Problems - Basic Mathematics~~

Since integers can be positive or negative numbers i.e. as these numbers are preceded either by a positive (+) or a negative sign (-), it makes them a little confusing concept. Therefore, they are different from whole numbers. Let us now see how various arithmetical operations can be performed on integers with the help of a few word problems.

## ~~Positive And Negative Decimal Word Problems~~

Keep the sign of the first number. Change the subtraction operations to addition operations. Change the sign of the numbers that follow to the opposite, i.e., positive becomes negative, and negative becomes positive. Then follow the rules for addition problems.  $(-) - (-) = (-) - (+) = (+) - (-) =$
