The Nation and the Child – Nation Building in Hebrew Children’s Literature, 1930–1970 is the first comprehensive study to investigate the active role of children’s literature in the intensive cultural project of building a Hebrew nation. Which social actors and institutions participated in creating a Hebrew children’s literature? How did they envision their young readership and what new cultural roles did they prescribe for them through literary texts? How tolerant was the children’s literary field to alternative or even subversive national options and how did the perceptions of the “national child” change in the transition from the pre-state Jewish settlement in Palestine to a sovereign state? This book seeks to provide answers to such questions by focusing on the literary activities of leading taste-setters and writers for children, from the most intense period of Israeli nation building – the 1930s and 1940s, the two last decades of the pre-state era, and the 1950s, the first decade following the establishment of the State of Israel in 1948 – through the 1960s, when the nation-building fervor gradually waned.

This book, first published in 1978, examines the confrontation of the Jewish community of Palestine – the Yishuv – with its Arab question in the period immediately following World War I, a period of excitement and uncertainty. Its main focus is on the different ways in which the men and women of the Yishuv perceived and defined the question of relations with the Arabs, and how they proposed to deal with the problems that arose.

The exodus of refugees from Nazi Germany in the 1930s has received far more attention from historians, social scientists, and demographers than many other migrations and persecutions in Europe. However, as a result of the overwhelming attention that has been given to the Holocaust within the historiography of Europe and the Second World War, the issues surrounding the flight of people from Nazi Germany prior to 1939 have been seen as *Vorgeschichte* (pre-history), implicating the Western European democracies and the United States as bystanders only in the impending tragedy. Based on a comparative analysis of national case studies, this volume deals with the challenges that the pre-1939 movement of refugees from Germany and Austria posed to the immigration controls in the countries of interwar Europe. Although Europe takes center-stage, this volume also looks beyond, to the Middle East, Asia and America. This global perspective outlines the constraints under which European policy makers (and the refugees) had to make decisions. By also considering the social implications of policies that became increasingly protectionist and nationalistic, and bringing into focus the similarities and differences between European liberal states in admitting the refugees, it offers an important contribution to the wider field of research on political and administrative practices.
